

Flameproof Products

For underground mining applications
and other hazardous areas

Vehicle Headlights

The Series 251 Flameproof Headlight is suitable for use on all electric mobile or stationary machinery and is manufactured from high tensile bronze. Heat dissipation is maximised by the durable external finned construction providing prolonged lamp life (in excess of 2000 hours).

Standard headlight has either a 35 watt or 20 watt quartz halogen globe. Variations include red lens for tailgate use, combination headlight/tailgate configuration consisting of a globe and LEDs for mobile machines and LED panel fitted for flameproof indication.

Cast Switches and Start/Stop Stations

The Series 351 Cast Switch Enclosure is made from high tensile bronze and can be supplied with options that include switch pushbutton, window or junction box.

The Series 363 Combination Enclosure/Start/Stop Control Station has latching and locking facilities on the stop button and a brass start button operator. The enclosure can accommodate up to six gland entries.

Cast Junction Boxes

The Series 198, 363 and 178 Junction Boxes are manufactured from high tensile bronze and can be fitted with various receptacles, gland entries, pushbuttons and selector switches. Options include extra cable entries or receptacle pads.

Plugs, Adaptors and Reducers

A range of Flameproof Plugs, Spigot Adaptors (straight and right angle) and Reducers is available in various sizes, with imperial items on request. Please consult relevant data sheets for specific details.
